ITG PROFILE

[About Integrated Technology Group](#)

Integrated Technology Group is a dynamic, innovative, and technology driven group of companies that lead in the areas of e-Learning, Enterprise Resource Planning, advanced Web Development, and professional Multimedia and Design Services. ITG operates through three subsidiaries -EPOCH Technologies, JAID Productions, and TriAx Automation—which render comprehensive, complementary, end-to-end IT solutions in software development, visual production, and process automation respectively.

Since its inception in 1989, ITG lead in technological innovation and was the first Middle Eastern firm to develop and export electronic data interchange (EDI) solutions into the European market in 1991. Managing a steady growth and technological lead in the past 15 years, ITG was the first to harness XML technology to develop the most comprehensive online Quranic resource Website in the world; www.altafsir.com. In addition, ITG was the first Jordanian software company to develop and deploy an integrated, multilingual enterprise resource planning (ERP) solution in 1995, and the first company in the Arab world to develop a world class comprehensive e-learning platform; EduWave™.

About 7% of ITG's revenue is spent on R&D. The management realizes the importance of investing in research and development to maintain its technological lead and continuously develop innovative solutions to meet our customers' needs and requirements. Professional training is also an ongoing activity at ITG, in order to keep our professional staffs abreast with technological advancement, and methods that assist them in developing reliable, scalable, and robust solutions.

ITG has a strong local and international presence with deployments in Jordan, the Middle East, North Africa, Europe and the U.S. The firm focuses on providing timely, professional support to its clients, and pays close attention to maintaining the highest level of customer satisfaction attainable.

ITG specializes in providing state-of-the-art technologies and solutions in the following areas:

- E-Learning Solutions (e-Learning Platform EduWave™ & e-Content Development)
- ERP Solutions in three verticals (Manufacturing (Pharmaceutical Industries & Food Industries), Government (GRP), and Dealership Management).
- E-Business & e-Government Solutions.
- Web Design & Development.
- New Media, Multimedia and Visual Production (Computer Graphics & Animation, TV & Video production).
- Process Automation Solutions, for: irrigation, industrial & domestic applications.

ITG PROFILE

ITG works through a network of strategic partners and representatives in 15 countries worldwide in Europe, North America, South East Asia, the Middle East, and Africa. This gives ITG increased reach, and flexibility through effective utilization of the combined know-how and experience of its partners in their respective markets. It also provides the firm with additional support and stability, and adds to its core competencies that render it as one of the most competitive, leading IT companies.
